## WHY LOAD RITE?

Personal watercraft, jon and skiff boats, family and fishing boats, pontoons and catamarans all have a Load Rite trailer designed to fit like a glove.

## LOAD RITE ELITE SERIES

### TRAILER FEATURES

*Corrosion resistant hot-dipped galvanized steel or aluminum frames* - far outlast painted trailers.

*Galvanized steel axles with greaseable hubs* - allow the addition of grease without disassembly. Most models over 2,400 lb. capacity feature smooth riding torsion axles.

*Radial tires* - on all models with torsion axles except skiff trailers.

*Marine grade disc brakes* - on all models where specified for better stopping with less maintenance.

*LED lighting systems* - the latest in marine grade technology. Standard on most models, low current draw makes LED's easy on your tow vehicle. They are highly resistant to water damage making LED's the perfect trailer lighting system.

### MODELS

*Bunk models* - best suited for launching and loading in ideal conditions: lakes and non-tidal areas with good ramps.

*Roller models* - offer the ultimate in ease for frequent launching and loading of larger boats in less than ideal conditions. Our TPR<sup>®</sup> (Thermal Plasticized Rubber) rollers are soft, pliable, resilient, and non-marking. TPR<sup>®</sup> is simply the best roller material on the market.

### EXTRAS

Looking for something a little different? Options like aluminum wheels, Quick Slide<sup>®</sup> plastic bunk covers, spare tires and carriers, stainless upgrades, sideguides, drop-style tongue jacks and more can make your boat and your Load Rite stand out in a crowd.

### WARRANTY

Every Load Rite Elite Series carries a 2 Plus 3 Year Coupler to Taillight Warranty\*, is fully DOT compliant and proudly carries the certification of both the **National Marine Manufacturer's Association** and the **North American Trailer Manufacturers**.

## YOUR SAFETY AND TRAILER BRAKES

Brake laws vary by state and require dealers to sell trailers that comply with the brake laws of the state where the trailer will be registered. This is a very important safety issue. For full information contact the appropriate state Motor Vehicle Department. As always, for your safety, the safety of those in your party, and the safety of those around you,

Load Rite® recommends brakes on all axles where available.

## SPECIALTY MODELS

Personal watercraft, pontoons and catamarans each have a Load Rite trailer designed to fit like a glove. Featuring *corrosion resistant hot-dipped galvanized steel or aluminum frames* that far outlast painted components, greaseable hubs, and full DOT compliance.

*PWC models* are available to carry *one, two, or four PWC's* at one time. Single place models are available up to 1,200 lb., two place to 2,335 lb., and four place to 5,000 lb. capacity.

*Pontoon, tritoon, and catamaran models*, now featuring disc brakes, are available as single or **tandem axle and can accommodate craft to 28'**. Pontoon / tritoon capacities range to 5,000 lb., while catamarans range to 7,900 lb.

Every Load Rite Elite Series carries a 2 Plus 3 Year Coupler to Taillight Warranty, is fully DOT compliant and proudly carries the certification of both the **National Marine Manufacturer's Association and the North American Trailer Manufacturers.**
