LOAD RITE AND 5 STARR

LOAD RITE has been manufacturing marine trailers for close to four decades, and the 5 STARR brand has been part of the LOAD RITE family for over two decades.

So what are the differences between them? Which will best serve your boating style? In truth, the two model lines are more similar than different. Both are well made using the highest quality corrosion resistant components and share frame, axle and brake systems and a great warranty.

Whether LOAD RITE or 5 STARR, galvanized or aluminum, bunk or roller, a long service life can be expected from every trailer we manufacture.

Since we know the similarities between the lines, what are some of the subtle differences?

Full-Size Models Standard Features	LOAD RITE	5 STARR
Galvanized or Aluminum I-Beam Frames	✓	✓
Torsion Suspension <sup>1</sup>	✓	✓
Disc Brakes	✓	✓

Two Year Limited Warranty		✓
Five Year Structural Warranty	✓	✓

1. Most models. See specifications at [www.loadrite.com](http://www.loadrite.com).  
2. Except models under 18' capacity, skiff, and pontoon.

YOUR SAFETY AND TRAILER BRAKES

Brake laws vary by state and require dealers to sell trailers that comply with the brake laws of the state where the trailer will be registered. This is a very important safety issue. For full information contact the appropriate state Motor Vehicle Department. As always, for your safety, the safety of those in your party, and the safety of those around you, Load Rite recommends brakes on all axles where available.

ALUMINUM I-BEAM TRAILERS

LOAD RITE manufactures a wide range of I-beam models for V-hull , skiff, inboard, roller, and even Australian spec models. All are loaded with standard features such as Knott torsion axles and disc brakes intended to assure every journey is quiet, safe, and uneventful. Each is available with a generous selection of options to enhance the trailering experience and maximize enjoyable time on the water. After all, that's what it's all about.
